

It is my understanding that the FCC is considering giving LPFM service priority over FM translator service. I am very much opposed to this because the only radio station I listen to is K-Love which is an FM translator service. I listen to K-Love because of the positive, encourage message they project through their music and other programming. I can also count on K-Love to use Family Friendly language through their broadcast, something that is hard to find on other stations. Our community depends on K-Love as the only Christian radio station broadcasting 24 hours a day. Lives are changed daily through the positive message of K-Love. Please, do not take away this station by giving LPFM service priority over translator services.

Thank you for your consideration,
Tommi Harrell
